

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

Date	06 March 2025
Team ID	SWTID1741105070
Project Name	Cryptoverse:A cryptocurrency Dashboard
Maximum Marks	4 Marks
Team leader: Email id:	Indhuja S 12085bca22@princescience.in
Team member: Email id:	Haritha M 12061bca22@princescience.in
Team leader: Email id:	Jainash parveen A 11934bca22@princescience.in
Team leader: Email id:	Priyadharshini P 12131bca22@princescience.in

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Crypto Currencies and Discovery	Search for crypto currencies
		Top 10 crypto currencies on home page
FR-2	Price chart	You can see the price chart of specific crypto currency in it
FR-3	Admin Management	Manage Users and Accounts
		Monitor System Analytics

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The app should have an intuitive and user-friendly interface, ensuring smooth.
NFR-2	Security	API Requests must be secured. The app should prevent unauthorized .
NFR-3	Reliability	The app should ensure a consistent and uninterrupted experience, minimizing crashes and downtime.
NFR-4	Performance	Crypto currencies should load with minimal buffering. The app should respond to user interactions (search, price chart) within 2 seconds

NFR-5	<b>Availability</b>	The system should maintain an uptime of at least 99.9%, ensuring accessibility across different time zones.
NFR-6	<b>Scalability</b>	The app should handle increasing numbers of users and concurrent streams efficiently without performance degradation. The architecture should support future feature expansion.
